Vortex Standard LRBC Vortex Optical Online Ballistics Calculator February 26, 2008 HuntingNut.com website offers point blank ballistic and re-titled software for free. In other words, the program is absolutely free forever - not just during the trial period. We always use point planks to calculate the rifle's come-ups and winds, as well as compare ballistics between different chambers or compare different bullets. Point planks allow you to change the bullet BC value and immediately see the effect on wind and drop. Point blank calculates muzzle energy and recoil force. Point Blank also holds all the re-power information in the built-in database. Enter caliber (chamber), bullets, powder, speed and other important variables. You can then quickly access hundreds of different load combinations. Click here to download point blank re-installation and ballistic software v2.0 (ZIP Archive). (Note: This 1.33mb file is for Windows computers; you can also plot shots on test targets using point planks; this makes it easy to compare the accuracy of different recipes during load development. Similar post: Versatile Point Bean Ballistic Software Offers Free Point Bean Software Free Ballistics Program Lapua Free Advanced Ballistic Software Sierra Infinity 7 Ballistic Software Free Recoil Calculation - Video Show Permalink Hot Deal Calculate ballistic reloads, make the leap from dedicated devices to smart phone apps. Here are some of the best details you can download: August 22, 2019More Range Life combines complete field environmental measurements with accurate ballistic solutions from the integrated Honed 4DOF® ballistic solver, and this rugged all-in-one handheld unit provides the convenience and accuracy you need for long-distance success in any condition. Shipping now! The free trial 139.46 MB continues and the app Lapua Ballistics is the ultimate in accurate external ballistic software for inducing altitude (shooting distance) and wind correction solutions to range, in special operations or hunting fields. Lapua's Fast Target Unlimited (QTRU) software is for PC and home calculations, bullet comparison, ballistic table printing and more, while the new Lapua Ballistics program is always available in your pocket - with the same very high level of accuracy. Lapua ballistics are based on accurate Doppler radar ballistics measurements of Lapua bullets, which are only available for Lapua bullets. This allows you to it is much more accurate than other ballistic programs for ballistic mobile phones. Only fast target unlimited software can be compared to this level of accuracy. For example, the program's altitude error is less than 2.5 cm (1) for a 338 Lapua Magnum at 1,500 meters (1,640yds), less than a quarter of a single click, and a standard 1..4 MOA click range. For traditional B.C. (G1), the error exceeds 1 meter (>40). Lapua Ballistics is a free trial software application in another subcategory that is part of the gaming and entertainment category. The app is currently available in English and was last updated on 02/01/2014. The program can be installed on Android 1.6 and above. The file size of Lapua Ballistics (version 2.0.74) is 139.46 MB and can be downloaded from our website. Click the green download button above to get started. So far, the program has been downloaded 434 times. We have already confirmed that the download link is safe, but for your own protection, we recommend scanning the downloaded software with an antivirus. Publisher LapuaBallistics Release Date 2014-02-01 Language English Category Games and Entertainment Subcategory Different Operating Systems Android File Size 139.46 MB Total Download 434 License Model Free Trial Price N/A Here you can find lapua ballistic's change log 2013-08-21. The latest version is 2.0.74 and has been updated to soft112.com 2019-09-16. See below for changes to each version: Our recommendations for multiple fixes and update-related programs
